

Appl. No. 10/615,412
Amendment Date: February 17, 2006
Reply to Office Action of December 14, 2005

Amendments to the Specification:

Please amend the specification as follows:

5 Page 30, line 22 after "identifier." Insert -- The term "notice identifier" and
 "recall notice identifier", which are used interchangeably in this application,
 mean a descriptor of the particular recall notice being sent, rather than a
 descriptor of any particular element in the product or products being recalled.
 Also, the notice identifier or recall notice identifier is stored with the textual
10 description of the recall notice, so that the textual description can be retrieved
 by knowing the recall notice identifier. --
